How much did the under-5 mortality rate change from 1990 to 2016?
Under-5 mortality rate, both sexes combined, 1990-2016

What caused the most deaths in different age groups in 2016?
Percent contribution of top 10 causes of death by age group, both sexes, 2016

India: Health of the Nation's States – The India State-Level Disease Burden Initiative.
Proportion of total disease burden from:
Premature death: 69.0% | Disability or morbidity: 31.0%

What caused the most years of life lost, by sex, in 2016?
Top 15 causes of YLLs, ranked by percent for both sexes combined, 2016

What caused the most years lived with disability, by sex, in 2016?
Top 15 causes of YLDs, ranked by percent for both sexes combined, 2016

*COPD is chronic obstructive pulmonary disease.
*Sense organ diseases includes mainly hearing and vision loss.
Proportion of total disease burden from:
CMNNDs: 36.9% | NCDs: 52.1% | Injuries: 11.1%

How have the leading causes of death and disability combined changed from 1990 to 2016?
Change in top 15 causes of DALYs, both sexes, ranked by number of DALYs, 1990-2016

Leading causes of DALYs 1990
1. Diarrhoeal diseases [13.1%]
2. Lower respiratory infections [10.0%]
3. Tuberculosis [5.9%]
4. Measles [5.2%]
5. Malaria [4.4%]
6. Other neonatal disorders [4.2%]
7. Preterm birth complications [4.1%]
8. Neonatal encephalopathy [3.6%]
9. Stroke [2.7%]
10. COPD† [2.2%]
11. Tetanus [1.8%]
12. Congenital birth defects [1.7%]
13. Iron-deficiency anaemia [1.7%]
14. Ischaemic heart disease [1.5%]
15. Hepatitis [1.4%]
16. Sense organ diseases‡ [1.1%]
17. Falls [1.0%]
18. Low back & neck pain [1.0%]
19. Road injuries [0.9%]
20. Chronic kidney disease [0.9%]

Leading causes of DALYs 2016
1. Diarrhoeal diseases [7.6%]
2. Stroke [5.8%]
3. Ischaemic heart disease [4.5%]
4. Lower respiratory infections [4.0%]
5. Tuberculosis [3.5%]
6. Iron-deficiency anaemia [3.2%]
7. Malaria [3.1%]*
8. COPD† [3.0%]*
9. Preterm birth complications [2.5%]
10. Road injuries [2.3%]
11. Low back & neck pain [2.2%]
12. Falls [2.1%]
13. Chronic kidney disease [2.0%]
14. Other neonatal disorders [2.0%]
15. Neonatal encephalopathy [1.8%]
16. Congenital birth defects [1.2%]
17. Hepatitis [1.0%]
18. Measles [0.2%]
19. Tetanus [0.1%]

*Change not significant.
The percent figure in brackets next to each cause is DALYs from that cause out of total DALYs.
†COPD is chronic obstructive pulmonary disease.
‡Sense organ diseases includes mainly hearing and vision loss.
§Self-harm refers to suicide and the nonfatal outcomes of self-harm.

What caused the most death and disability combined across age groups in 2016?
Percent of DALYs by age group, both sexes, 2016

The number in the bracket on top of each vertical bar is the ratio of percent DALYs to population for that age group.
The number in parentheses after each age group on the x-axis is the percent of population in that age group.
What risk factors are driving the most death and disability combined?
Contribution of top 10 risks to DALYs number, both sexes, ranked by number of DALYs, 1990-2016
