

Workshop Series 2019 – 20

Contingent Valuation of Health Programs-assigning Monetary Values to Health Outcomes

September 16 -20, 2019 (Mon – Fri)

(Last date of registration: September 2, 2019)

Course Director: **Prof. Sanjay Zodpey, Director**

Course Coordinator: **Mr. Shomik Ray, Associate Professor**

Training Venue

Indian Institute of Public Health- Delhi

Public Health Foundation of India

Plot 47, Sector 44, Institutional area, Near HUDA City Centre metro station, Gurgaon-122002, Haryana, India

Key contact Person

Ms. Tanuja Bhandari, Assistant Manager – Program (Trainings)

Email: trainings@iiphd.org, Ph: +91 124 4722900 (Extn. 4110) www.phfi.org

About the workshop

Assigning monetary values to health outcomes has been a contentious issue for health program managers and researchers due to ethical and methodological concerns for long. Monetary values of health outcomes are needed to arrive at costs of interventions/treatments and is a key outcome measure for economic evaluations, especially cost-benefit analysis. Contingent valuation (CV) method is a survey based, hypothetical and direct method determine monetary valuations of effect of health technologies or interventions. The use of contingent valuation methods in health care is well established in literature and is under-researched in India. The method provides a promising tool to value health outcomes and can have multiple uses in program evaluation beyond economic evaluation.

This training program would provide a hands on training on CV methods including design, execution, data analysis and use of such studies. The participants would conduct a CV study and use their own data to analyse and interpret results.

The course would use Stata software for statistical analysis and participants are expected to have basic understanding of the use of statistical software.

Registration Fee

Indian National: 12500 INR per participant

Foreign National: 25000 INR per participant

The registration fee includes course kit, lunch and snacks. Please note that the participants will have to bear their own travel, boarding and lodging expenses. However, the organizers will be able to provide a list of hotels or guest houses nearby the institute upon request.

Who should attend?

Programme managers having responsibilities in programme evaluation including economic evaluation, researchers engaged in evaluation, effectiveness research and health technology assessment would benefit.

Awareness of survey methods and quantitative data analysis would be helpful though not essential.

Contents

- Monetary valuations of health outcomes
 - Traditional methods
 - Limitations of existing methods.
- Contingent valuation of health outcomes
 - Methods of contingent valuation
 - Biases in contingent valuation
- Designing a contingent valuation study
- Data collection
- Data entry, analysis and interpretation
- Use of Contingent Valuation results

About the faculty

Shomik Ray would lead the training program. He is a senior faculty at IIPH Delhi and has 21 years of experience in the development sector in India. He specializes in Program Management and Economic Evaluation and has special interest in training
