Workshop On Writing and Publishing a Scientific Paper

16th & 17th December 2019

Indian Institute of Public Health-Hyderabad
(IIPH-H)

<https://phfi.org/iiph-hyderabad/>

About the Workshop

Scientific writing is a necessary skill that must be learned by repetitive practice of reading, writing and revising. Scientific writing can take many forms such as project report or dissertation or scientific article in an academic journal.

This workshop is intended to impart researchers with basic skills in writing and publishing a scientific paper in a peer reviewed journal. The workshop will help the participants to understand how to draft a scientific paper, become familiar to construct an argument in a scientific manuscript, do effective literature search and review, manage references using different software, understand authorship, plagiarism and ethics in publication. In addition, the course will provide participants an understanding of the submission process and peer review, selection of a journal and responding to reviewers comments. If participants have sufficient data to begin writing a paper, they could work on the draft during group work and exercises in the course with feedback from the faculty.

Who Should Attend?

This course is ideal for post graduate and doctoral students, physicians and medical students, researchers and professionals working in government, NGOs and hospitals, clinical and health researchers, project managers, research staff and coordinators and data managers.

Post graduates, doctoral scholars and medical doctors who are currently working on their dissertation or recently completed their research work and interested to publish their research findings will greatly benefit from this course.

Course Content

- ✚ Writing for a scientific journal
- ✚ Manuscript Writing - Writing good titles, Abstracts, Methods, Table, Figures, Results and Discussion
- ✚ Writing abstract for conference presentations
- ✚ Literature Search
- ✚ Reference Management
- ✚ How to select a journal & submission process
- ✚ Peer review & responding to reviewers comments

Learning Outcomes

- At the end of course, participants would
- ✚ Have improved their own scientific writing/documentation skills
 - ✚ Understand how to write a scientific paper. Prepare a rough draft of a scientific paper from their dissertation or research project with inputs from faculty
 - ✚ Understand the publishing process and how to select a journal including why manuscripts get accepted/rejected
 - ✚ Understand how to respond effectively to reviewers' comments

About the Organization

Public Health Foundation of India (PHFI) is a response to address the limited institutional capacity in India for strengthening training, research and policy development in the areas of Public Health through its centres of excellence and Indian Institutes of Public Health. It is a public private partnership that was collaboratively evolved through consultations with multiple constituencies including Indian and international academia, state and central governments in India, multi & bilateral agencies and civil society groups in India. Today the initiative enjoys substantial support in India and internationally.

The **Indian Institute of Public Health (IIPH) Hyderabad** commenced its activities on July 1, 2008, with a mission to deliver public health education, pursue research and advocacy and support policy development. It lays strong emphasis on pursuing public health policy, practice, training and research, positioning its programmes according to the public health priorities of the state and the nation. The institute has brought together a highly qualified and diverse faculty of nationally and internationally trained and extremely motivated public health academicians and practitioners. IIPH Hyderabad's goals involve training public health professionals through long- and short-term courses each year.
