

**INDIAN  
INSTITUTE OF  
PUBLIC HEALTH  
DELHI**

Indian Institute of Public Health- Delhi (IIPH- Delhi) is glad to announce the “Workshop Series” for the academic year 2020-21. This is specially targeting to public health and clinical researchers and health program managers. This series aims to enhance the capacity and skills of health professionals, in quantitative and qualitative research techniques, management tools for effective program management and advocacy. Highly qualified and competent multi-disciplinary group of in-house faculty at IIPH-Delhi will facilitate these workshops. The workshops will follow principles of adult learning, using techniques like interactive lectures, group discussions, practical exercises using relevant softwares, evaluation exercises and presentation by participants. These workshops are ideal for physicians, medical students, clinical researchers, project managers, NGO coordinators, nutritionists, data managers, pharmaceutical scientists, statisticians and program managers working at district, state and national level.

#### About the Institute

The core mandate of Indian Institute of Public Health- Delhi launched under the aegis of Public Health Foundation of India, is to address the need for trained public health workforce in India that can supplement ongoing efforts to provide services and ensure reach to those most needy. It aims to strengthen the overall health system in country through education, training, research, advocacy and policy initiatives. The strength of the institute lies in the multi-disciplinary faculty trained in specific domains that facilitates a multi- dimensional perspective towards academic endeavours, training programs and research projects. It strives to make public health education and research activities value-based and relevant to India, while maintaining world class standards. This helps in assisting the growth of existing public health institutions in the country. The faculty bio-sketch can be accessed at [www.phfi.org](http://www.phfi.org).
