Link to registration form: <http://tof.phfi.org/>

About the course

Monitoring and Evaluation (M&E) is the process by which data are collected and analysed in order to provide information to policy makers and others for use in program planning and project management. M&E is important because it helps program implementers make informed decisions regarding program operations and service delivery based on objective evidence. It also ensures the most effective and efficient use of resources, helps determine the success or failure of a program, and assists in meeting organizational requirements. M&E skills are crucial to the successful implementation, design, and tracking of program progress and output of various programs. This workshop offers intensive training that will cover the fundamental concepts and tools for monitoring and evaluation of various health programs.

Contents

- Introduction to M&E
- Overview of M&E plan
- M&E frameworks
- Indicators
- Data demand and use
- Data Sources and Data Quality
- Program Evaluation
- Select M&E tools: PRISM, DQA & DDIU

About the Faculty

Dr. Himanshu Negandhi, the key resource faculty, has been trained as a medical postgraduate in public health. He has experience of teaching public health to postgraduate medical students, paramedics and in-service public health professionals over his career. He has also been actively engaged in curriculum designing, teaching and training of public health courses. His areas of interest include Program Evaluation, Systematic Reviews, Health Effect Measurements and Program Evaluation. He is currently pursuing an active interest in evidence-based medicine and linking evidence to policy.
