Workshop Series 2022-23 Online Workshop on Designing, Analysis and Interpretation of Quantitative Health Research Nov 30- Dec 02, 2022

Last date of registration: 16th Nov, 2022

Course Coordinator: Dr. Saurav Basu, Assistant Professor, Indian Institute of Public Health - Delhi

Link to registration form: <http://tof.phfi.org/>

About the course

Quantitative health research involves epidemiological and statistical skills. Once data is collected one must be skilled in managing such data in terms of its entry, cleaning, management, analyses and finally interpretation. All of these links are critically important in creating results which will be useful at the end in terms of fulfilling the purpose for which huge amounts of resources are devoted in any research project. This workshop will benefit anyone involved in quantitative health research such as surveys, experiments or trials, disease surveillance etc. Thus this workshop can be very useful for health professionals, social researchers, health economists, NGO professionals and government health workers. This workshop will enable the participants to manage, analyse and interpret data in quantitative health research.

Note: This online workshop will be facilitated through CISCO WebEx platform at IIPH-Delhi, therefore, please ensure stable internet connection.

Contents

- Overview of quantitative research
- Basic epidemiological and statistical concepts for quantitative research
- Data entry and management using CSPro
- Mobile phone based efficient data entry using Epicollect/ODK
- Data analysis in quantitative research using SPSS
- Interpreting quantitative data analysis results
- Introduction to secondary data analysis and research
