Click here to [Apply Online](#)

This is an online workshop thus requires participants to have their own laptop/desktop and stable internet connection. The workshop will be facilitated on CISCO WebEx of IIPH-Delhi Platform.

About the course

Nutrition has always been considered critical for human and economic development and its neglect would adversely have the impact on health, cognitive development of children, productivity of the people, economic growth of the country and pace of national development. Public Health Nutrition (PHN) is recognized as an educational discipline with the potential to train candidates to not only address nutritional issues but also work in sync with other stakeholders/departments/organizations towards ensuring better health for the masses. The proposed three day training program is a basic level course aims to provide basic understanding of pertinent nutritional issues and related policies and programs strategies focusing on maternal, infant, child and adolescent nutrition.

Contents

- Introduction to public health nutrition
- Nutrition status and its determinants-global and LMIC context
- Nutrition during life course
- Programs and policies
- Introduction to nutrition epidemiology and research methods
